Topical Skin Adhesive

Strong and secure • Microbial barrier protection • Improved patient safety
Excellent cosmesis • Reduced needlestick injury • Quick and easy
**LiquiBand® Surgical S** contains a blue Octyl-Blend™ skin adhesive, this superior combination of Topical Cyanoacrylate Adhesives provides the fast setting wound closure properties of butyl-cyanoacrylates, with the more flexible wound dressing capabilities of octyl-cyanoacrylates, in a new single formulation.

**Advantages for the Patient**

**Protection against infection** - Cyanoacrylates provide microbial liquid barrier protection.

**Fast setting** - LiquiBand® Surgical S contains an Octyl-Blend™ adhesive which sets in <10 seconds.

**Strong and secure results** - With only one application LiquiBand® Surgical S is as strong as sutures.

**Excellent cosmetic outcome** - Cyanoacrylates provide as good or better cosmetic outcomes than sutures.

**No suture removal** - Eliminates the added burden of having sutures removed.

**Stage 1 - Incision Closure**

Fast setting and strong Octyl Blend™ cyanoacrylate applied via the Flow Control™ applicator provides fast and accurate closure of well apposed skin edges.

**Stage 2 - Strength With Protection**

The dressing application is applied over the wound area to act as an occlusive, waterproof, microbial barrier. This flexible dressing strengthens the primary closure.
