Dear Valued customer

Re: Kebomed is on the Countess of Chester Framework - Supporting reliable enteral feeding accessory provision for patients in the community with our AMT brands and products.

Kebomed is pleased to announce that we are included on the Countess of Chester Hospital NHS Foundation Trust framework F/080/EPAS/26/MH - Enteral Feeding Accessories Delivery Service.

The framework provides NHS Trusts and Health Boards with access to an established enteral feeding accessories delivery service as an alternative procurement route from the main feed items, helping to support the ongoing needs of patients receiving enteral nutrition in both the acute and community setting.

How can Kebomed support your patients?

Through the framework Kebomed can support NHS services in providing patients with a reliable and consistent home delivery service for their enteral feeding accessories, helping to ensure that essential products are available when they are needed.

We recognise the importance of continuity of supply for patients, families and carers, and our aim is to make the process as straightforward as possible for healthcare professionals and the patients they support.

Find out more and next steps

If you would like to understand more about the framework and how Kebomed can support your service, please access the framework information below: <https://lnkd.in/eVRueshb>

Request your briefing pack to find out more about the service and how Kebomed can support your Trust or Health Board. Please contact info@coch-cps.co.uk or speak with your local Kebomed/AMT Clinical Sales Consultant. Kebomed

Look forward to hearing from you and working together for the benefit of your patients and carers.

Yours sincerely

Ann Gawthrope
Head of Enteral Division
