Mediplus S-Cath™ System

Safer, more precise suprapubic catheterisation

Suprapubic catheterisation using the Seldinger technique and the patented Mediplus S-Cath™ System delivers a wide range of benefits including:

Greater control and accuracy – catheter placement is more precise than blind insertion

Unique patented design – 3 stage guidewire

Ease of use – resulting in increased user confidence

Minimises risk – of trauma and tissue damage

Cost savings – can be used in an outpatient setting, saving time and money compared with inpatient suprapubic catheterisation

Convenience – supplied as a complete, sterile, cost-effective kit comprising needle, guidewire, sheath dilator, silicone Foley catheter, scalpel and two syringes

Universal application – for adults and children of both genders

Wide range of sizes – 8Fr. to 16Fr.

Foley catheter – features a fully integrated balloon and the choice of an open or closed tip

Recommended – by the National Institute for Health and Care Excellence (NICE) and approved by the British Association of Urological Surgeons (BAUS)

Award winning – recipient of 2017 Queen's Award for Innovation

“I'm delighted with the S-Cath™ suprapubic catheter. It is safe and can be inserted in a controlled manner with the Seldinger technique. The kit itself is robust and of good quality, and I would strongly recommend its use in all urology, gynaecology, and A&E departments, as well as in all theatre suites”

Trevor J Dorkin, Consultant Urological Surgeon
The Freeman Hospital

Insertion technique

Having injected local anaesthetic at the entry site, using an 18g needle, make a 1cm subcutaneous incision and follow the 8 steps below -
