Tension-Free Support for
Incontinence now backed by¹³
years of follow-up data¹.

GYNECARE TVT™ Obturator System

Time tested

Sustainable success demonstrated in two studies ranging from 5 to 13 years.^{1,2}

13-year outcomes as reported by Serati et al. (2020)^{1}*

90% objective and 95% subjective cure rate

5-year outcomes as reported by Cheung et al. (2014)²

5-year outcomes as reported by Cheung et al. (2014)²

95% of women reported they were either cured or experienced improvement.

83% of women achieved complete objective cure.[£]

Outcomes you can trust

GYNECARE TVT™ Obturator System has been evaluated in 63 RCTs.³

Patients treated with GYNECARE TVT™ Obturator System had lower rates of urinary obstruction/retention and urinary tract infection, leading to overall lower rates of the urological compliance studied.^{4†}

*In a 13-year prospective observational study where 168 women were treated with the Gynecare TVT™ Obturator System

£ Women showed no urine leakage during standardized urodynamic testing, including the cough stress test

† In a 5-year analysis of 9,754 women treated with various brands of obturator slings
